

Have you ever imagined a water supply that is free from virtually every water impurity there is?

The Monarch Advance whole house system can do away with the need for individual water filters all around your home.

A simple system that is connected to the incoming water supply with a long life low cost media, that filters and purifies water as and when it is used.

It can be used as a single appliance or in series with other appliances, to give water free from Chlorine, bad tastes and odours, Aluminium, Chromium, Cadmium, Lead, Selenium, and other metals including Nitrates and Arsenic.

Applications – water filtration/purification for your complete home, or a dedicated faucet for your kitchen sink

- Two compact water purifiers with 'twist and out' easy change cartridge system. Also incorporates auto shut-off head that turns off the water supply when you change the cartridge. Both models giving over 5400 litres per year (approx. 15 litres per day) between annual cartridge change.* Advance 100 Plus also helps reduce kettle scale.
- Two 'whole house' models to give up to 900 litres per day that last up to 3 years*
- All minerals retained, especially magnesium a key flavour carrier
- Low maintenance and running costs
- Suitable for complete properties or individual applications including plumbed in fridges, coffee machines, as well as for vegetable washing and cooking to allow you to enjoy the real flavours of food...
- Monitoring service available - simply return your guarantee card and we will send you a reminder when due
- No programming required - just connect and go...
- Compliments other water treatment equipment i.e. water softeners, Scaleouts etc
- Certified to NSF 42

Impurities significantly reduced*

- Chlorine including bad tastes and odours
- Aluminium
- Chromium
- Cadmium
- Lead
- Selenium
- And other metals including; Nitrates and Arsenic

*independent test report available
